Report of Equipment and Supplies Stored At Clare Brett's

Equipment and supplies at Clare's place is more extensive than at first thought, however below is a list of items, the quantities will need some time to establish.

Fairly large amount of 14/3 copper, rubber covered electric cable. *60 ft*
One length of 12/4 copper cable with attached outside multi- socket box.
An undetermined number of outside floodlight boxes, weatherproof, with cable,.

One piece of blue coloured flannelette, about 8' by 10'
One box of plastic knives, spoons and forks. Number ?
Packets of serviettes, plain, about one dozen packets.
One 55 cup coffee urn, used as tea urn at Folklore.

Most or all of this equipment/supplies is from Folklore, but I didn't have time to establish all that was there, it will need some time to look everything over. I suggest that I contact Malcolm who ordered most of the stuff, and who would know perhaps what we paid for it. If this is agreed by the executive I will do this as soon as possible.
